

# Famed Vatican Organist Performs Here Tonight

Fernando Germani, famous Vatican organist, will make fifth appearance in Provo Monday evening as a number of Brigham Young University Community Concert series and also as a part of the Fine Arts Festival, which is conducted this month.

Germani will perform at 8:15 p.m. in Smith Auditorium. MR. GERMANI will open his concert with "Toccata No.

" by M. Rossi, followed by "Passacaglia No. 5" and "Battalia" by Johann Casparini. "Fantasia Forma di Eco" by J. Swarznick and "Concerto in E flat Major," "Pastorale" and Fugue in A minor (No. 6)" by Bach.

He will then play "Prelude on theme B.A.C.H." by Richard Keys Biggs and will conclude with "Fantasie Op. 52, No. 3" on the chorale "Hailst du: Goot zu loben, bleibe meine Seelenfreud."

In addition to hundreds of solo recitals, Germani also has appeared as guest soloist with numerous orchestras under celebrated conductors.

He now serves as organ professor and teacher of organ composition at the State Conservatory of Music in Rome and as a member of the St. Cecilia Academy of Music in Rome.

A first of two panels concerning poetry and religion will consider the involved relationship between poetry and religion.

EY WILL ASK, "Does poetry affirm the inner vitality of man?" second, "Does religion affirm the inner vitality of man?" and third, "Does poetry affirm the inner vitality of man?"

The panel will be held from 6 p.m. in the multi-purpose room of the Smith Family Living Center. Faculty and students are invited.

The panel is a part of the Arts Festival now in progress on campus. To stimulate creative work in religious art in the state and the church, the purpose of the festival which includes presentations by art, music, speech and English departments.

THE ENGLISH Dept. which is sponsoring the poetry festival will also present a lecture on the use of Marlowe's resources in literary creation May 1.

Operation between various departments is for the purpose demonstrating the relation between the different arts.

## 150 Prom Tickets Available Today

As a result of the returning of the blocks of tickets reserved by units, 150 Junior Prom tickets will be available Monday morning.

They include tickets for both evenings and each refreshment time. They will be sold in the lobby of the Smith Family Living Center as long as they last.

## Provo Community to Get Annual Cleanup May 3

Y's Work . . . Y's Play . . . Y's Day.

WORK AND PLAY—just the right proportion of each are the ingredients of this year's Y Day, which will be 3.

Students will follow tradition in spending part of the day cleaning projects around town and on campus, tawishing the letter of the Y banner and letting off in group games along with entertainment.

THE DAY WILL begin with "Gadianton bands" circling campus to wake up late or reluctant risers. It will with the Blue-White football game and an open-air concert on the tennis courts.

Many wards are planning breakfasts for this day, which the only "legit" holiday on campus during spring semester. After eating, students will join en masse in a giant rug-kicking of the winter-dirty campus and town, as well as in the tennis Y.

WARDS AND ORGANIZATIONS will be found in such activities as polishing fire truck brass until it gleams (and sliding down the pole), winging around tombstones for the spring bird's cache of paper and weeds and scanning campus hills for the outside remains of 5,000 candy bars.

Customarily students work with an organization to which they belong unless no organization is participating in Y Day. They then work with the ward of which they are a member.

AFTER THE WORK is done, play begins, when students gather in the fieldhouse the most important element of any day—drama.

Lunch will be served to all student who worked on Y Day projects. A pass will be given to all participating students to allow them to eat and to participate in recreation in the afternoon. This year, however, Y Day cards must also be presented at critique.

A PIE-EATING CONTEST, faculty race on balloon-tired bicycles, a custom sports show, the football game and drama will highlight this one day when students must be behind their beloved books and will not the faces of revered professors.

Chairmen are Wayne Burton and Berrey

## Mutual Interest In Preventing War Will Decide US-Red Arms Control

NEW YORK, April 24 (UPI)—The question of arms control is essentially one on recognition that the United States and Russia have strong mutual interests in preventing a war, a report issued by the Twentieth Century Foundation said today.

But the most dangerous aspect of today's balance of power is that strategic weapons would provide enormous advantage to the side that struck first, the report said.

Both American and Russian strategic doctrines reflect preoc-

cupation with the urgency of attacking in the event of evidence that the other is about to," the report by two members of Harvard University's Center for International Affairs said.

"THE GREATER the urgency with which the threat must be made in the event of signs the greater the likelihood of converting a false alarm into war itself," they warned.

The report, titled "Strategy and Arms Control," said inspection procedures—at present the massive stumbling block in the Geneva Nuclear Test Ban negotiations—have been overemphasized. "Inspection . . . is but

one of a series of problems involved in making arms control work," it said.

IT SAID A paradox of arms control was that armament agreements might actually reduce weapons stockpiles and lessen the possibility of a war by mistake.

"If both Soviet and American forces should succeed, through countermeasures or unilateral developments, reasonably invulnerable retaliatory systems, so that neither could disarm the other in a sudden attack . . . a large reduction in numbers might come naturally," it said.

THE AUTHORS of the report were Thomas C. Schelling and Morton H. Halperin.

## Y Women Plan Awards Night, Nominate Now

The 1961 Annals of Achievement under the heading "Life in Artistic Endeavor" is scheduled for May 10, and application forms are now available in the AWS office in the Student Service Center.

Sue Boyack, this year's chairman, encourages the nomination of girls doing well in their hobbies and anyone is eligible to nominate. Applications must be turned in to the AWS office by 4 p.m. Monday, May 1. Accompanying each form must be two letters of recommendation, one from the nominator and one from a bishop, teacher, etc.

A COMMITTEE of faculty members and students will select one girl on the basis of outstanding leadership and service, from the freshman sophomore, and senior classes. Recipients will also be given to the outstanding girls of the senior class, and one girl from each college will be chosen by her class to be honored also.

The girls who were honored last year were Judy Fullmer of

last year were Judy Fullmer of the sophomore class, Marcia Bradshaw, a junior, and Maxine Lewis, a senior. Judy is now president of Spur service unit; Joan is president of White Key this year, and Maxine is a member of Gamma Phi Omicron, the national home economics honorary organization.

If there are any questions concerning the applications, call Lynn Varner at extension 3013.

## Test Delay Caused By Disputes

WASHINGTON, April 24 (UPI)—A House Space Committee member said today "extremely important experiments" in nuclear testing have been delayed because of a dispute between the Civilian Space Agency and the Atomic Energy Commission (AEC).

Rep. Charles A. Mosher, R-Oio., made the charge in a report Brooks, D-La., about the Pines Brook reactor.

MOSHER SAID THE National Aeronautics and Space Administration's nuclear testing program "is troubled and to some degree frustrated by a smoldering jurisdictional dispute with the AEC."

"Some extremely important experiments are being done because of that dispute of lack of a decision as to which agency will do the work."

THE PLUM Brook reactor, located near Sandusky, Ohio, will be used to test materials and components of advanced propulsion systems.

It is designed to simulate the environment of outer space and eliminate faulty materials before they actually are launched.

One of the many features in the BYU Fine Arts Festival, which continues through May 5, is the Mozart opera, "The Marriage of Figaro."

THE PRODUCTION is scheduled for presentation April 27, 29 and May 1 in the Joseph Smith Auditorium at 8:15 p.m. Tickets are now available at the Smith ticket office. BYU students can get tickets with their identification card.

Music instructor Brandt B. Curtis will direct the four-act opera which tells the story of Figaro, a steward in the castle of Count Almaviva.

IN MARCH, CURTIS ARRIVED a debt from Marcellina, the housekeeper, and has promised to marry her if the debt is not paid by a certain time. But Figaro is in love with Susanna, the countess' chambermaid.

The count has fallen in love with Susanna also and plans to force Figaro to keep his bargain with Marcellina. Through a little intrigue on the part of the young couple and the countess, Marcellina's revenge against Figaro's unknown mother, and the count is thwarted in his plans.

The opera will be double cast with Thursday and Monday day cast members listed first.

IN THE TITLE ROLES of Figaro the steward will be Boyd Hancock and Ken Wilkes; and Lurleen Levar and Colleen Redford as his beloved Susanna. The Count and Countess Almaviva roles will be sung by Noel Twyford, Ruth Soderstrom and Nancy Empson and Julia Nielsen.

Joan Shaw and Marcia Hoyt will be seen as Marcellina, the housekeeper. Basilio, the music master who conducts a little intrigue for the Count will be Brent Shaw and Richard Brannah. Cherubino, the page, will be Nancy Folsom and Diane Heder.

OTHER members of the cast are Brent Shaw and Richard Brannah; Arnold Goldstein and Bill Ashmore; Don Corzio; Charles Curtis and Herb Green; Antonio; and Sherry Lynn Hillatt and Suzanne Sanborn, baritone.

Assisting Mr. Curtis in the production are Kenneth Noble, choral director; Charles Henry, scene designer; Carol McMillen, costumer; Harold Oakes, stage manager; and Solomon Aranda, painter.

BUCKET BRIGADE—No, the contents of the pails is not the traditional fire-fighting liquid. But it will do wonders for the 'Y' restoration of the white sheen of the emblem and the sparkle in the eyes of the Y student as he looks toward the mountain.

## ROTC Riflers State Champs After A.C. Win

The rifle drill team of Brigham Young University's ROTC emerged with top honors and became state champions in rifle drill competition recently.

**THE DRILL MEET** was held on the Utah State University campus in Logan. Leader was drill commander Robert Tanner.

With this win under their belts, the rifle drill team will be preparing during the next three weeks for the Area "G" competition, which will be held the weekend of May 12 on the BYU campus.

**TEAMS FROM** the seven Western states and Hawaii will be represented.

Some of these teams recently competed in the Cherry Blossom Festival in Washington, D. C.

### Quickie . . .

#### Want to Twirl Flag?

Tryouts for flag-twirlers will be held Thursday. Girls interested should be practicing and should apply in the Student Relations office, basement Student Service Center.

## Murphy Receives 3-Year Scholarship For Doctoral Work

**SHELDON R. MURPHY**

Sheldon R. Murphy, a chemical engineering student who will graduate this spring, has received a three-year National Defense Education Act scholarship.

**IT WILL BE** applied to doctoral work in chemical engineering at the University of York.

The scholarship, which varies with the situation of the recipient, will amount to \$10,200 for Murphy, who is married and the father of a young girl.

**MURPHY HAS** been an assistant in the College of Physical Sciences since his junior year. Donald Arnett J. Ho and his wife, Felt, are dorm parents for Felt and Fox Halls in Herzing Halls.

He is ward clerk in the BYU 3rd Ward and was chairman of Engineering Week this year.

### This Week We Honor . . .

## Sherri Olpin to Graduate at 19; Samuelsen Achieves in Music

**SHERRI OLPIN**

**ROY SAMUELSEN**

This week the College of Fine Arts honors senior Sherri Lynne Olpin, originally from McGill, Nevada. Sherri is majoring in commercial art and minoring in Spanish.

**A GRADUATE** of Provo High School, Sherri was active in school affairs. She was a member of the Spirit Committee and in her senior year she served on the Board of Coaches and was editor of the school yearbook.

Sherri entered Brigham Young University on an academic scholarship awarded by her high school. While a freshman she was a member of Theta Allexis.

In 1959 SHE designed the Orchid Float for the Homecoming Parade, which was selected the most beautiful, and has been a member of Orchids for the past two years. She was also a member of the Art Guild last year.

Sherri will continue her college education this August after going for three years, including summer sessions, and she will graduate at the age of 19. She plans to work for an advertising agency somewhere in the Salt Lake area after she graduates.

She is engaged to Douglas Johnson.

### Watch For...

**BUDWEISER** will meet Monday at 7 p.m. 134 South Provohome. The homecoming Queen and Foothill High School Graders will be present for shirt and preparations made for the coming.

East Central State students and musicians will go to the Man's Temple Auditorium Saturday evening for the concert.

Call Dale Abshier, FR 3-3145 for further information.

# BYU Has Three Telescopes In One, Plus Camera to Aid Star, Moon Study

by Errol Genta

University Feature Writer  
The most powerful 300 times closer to the Brigham Young University campus when the 24-inch reflecting telescope of the Orson Pratt Astronomical Observatory, atop the Eyring Science Center, is put into operation.

The telescope, which was installed in June, 1958, is the largest in Utah and is one of the best such instruments in the western United States. It was built by Tinsley Laboratories of Berkeley, Calif., and is used for astrophysics research at BYU and in planetarium demonstrations.

**IT IS** A magnificent instrument, capable of bringing the celestial bodies within easier study range. The mechanical system which makes it can be set to track the stars and will move to match their apparent movement as the earth revolves upon its axis.

According to Dr. Delbert H. McNamara who has charge of the \$40,000 instrument, it is the first three telescopes in one, plus a camera. It has both the Cassegrainian focus and the Newtonian focus, as well as a six-inch refracting telescope attached which is used to guide the larger instrument and gives definition of stars and planets fine.

A NEWTONIAN focus diverts the prime focus off to the side of the telescope, to a place convenient for both visual and photographic use.

A Cassegrainian focus places the focal point at the bottom end of the scope. This position of the focus is more convenient than the Newtonian for use of auxiliary instruments. The observer can easily reach the focus mechanism and can guide the instrument with ease.

**A 24-INCH** reflecting mirror is what makes the scope such a powerful magnifier. This concave mirror, set at one end of the telescope, has a curved center through which reflecting light or image is transmitted to a smaller lens and again reflected to the eye piece to be viewed by the observer.

The scope makes possible magnification up to 14,000 times, but its normal usage power is 300 times the power of the naked eye.

HOW HAVE become, in their favorite phrase, deeply "lived" in the life of their congregation. John is an usher who was chairman of the Every Member Counts last fall. Ellen was Sunday School class president. She never says no when she's to help with a church supper or a bake sale.

Recently one of the Jones' sons was seriously injured in an accident. The pastor joined Ellen and her husband at the hospital. It was the time he had had occasion to speak with them, on a deeper than polite conversation, life and death and the nature of the Christian faith.

WAS IT a coincidence? John did not believe in life after death, and that Ellen was deeply attached to the idea of incarnation. Neither of them more than a vague conception of the Christian teaching resurrection and eternal

life. They are a composite of typical American Protestants whose religious attitudes were studied in a four-nation-wide survey initiated by the United Presbyterian Church in the U.S.A.

E SURVEY was based on

ed eye, Dr. McNamara said.

**A REFLECTOR** telescope brings the starlight to a focus by reflection from a mirror. The surface of the mirror, instead of being flat like a looking glass, is made concave so that it reflects toward its center like a saucer. The upper surface of the mirror is covered with a bright, reflecting coat of aluminum. The image is reflected to a small lens and then reflected to the eye piece, which is the principle of the reflecting telescope.

**IN THE SIX-INCH** reflecting scope, the starlight, as it passes through the lens, is bent, or refracted by the curved surface of the glass so that it is brought together at a bright spot, called the focal point. The lens acts upon the burning glass acts upon sunlight, concentrating it into one bright spot.

The largest lens scope in operation today is 40 inches in diameter, while the largest reflector is 200 inches in diameter. Size is one of the main advantages that a reflector has over a lens. A refractor type telescope has an advantage in that stars are a rule, appear sharper and better defined when viewed through it.

**PERICAPS** THE most unique feature of the BYU scope is the Baker correction attachment which converts the visual scope into a wide angle camera capable of photographing 40 times more area without distortion than would be possible without the corrector.

The Baker corrector photographs a 25 degree section of sky on a plate seven inches square. This attachment makes it one of the most versatile instruments in the world. The instrument is operated by an electric motor.

**IN ORDER** to realize the full potential of the telescope as an astronomical research tool, the University has recently built a photoelectric photometer last year, which is attached to the Cassegrainian focus.

**TEACHERS WANTED**  
\$5,000 and up. Vacancies in all western states. Inquire Columbia Teachers Agency 1320 Pearl, Boulder, Colorado

## Survey Reveals Many Americans Lack Belief in Religious Doctrines

by Louis Cassels  
sited First International  
and Ellen were joined by ac-  
tive church members who  
get up early every Sun-  
moring to bring their  
children to the 9:15 family  
service at the Surbur-  
Heights Presbyterian  
Church. John was raised a Baptist, and grew up in the Episcopal  
Church. But they joined the  
Methodist church when they  
moved into their new neighbor-  
hood because it is close to their  
home and most of their child-  
playmates go to Sunday  
school there.

HEY HAVE become, in their favorite phrase, deeply "lived" in the life of their congregation. John is an usher who was chairman of the Every Member Counts last fall. Ellen was Sunday School class president. She never says no when she's to help with a church supper or a bake sale.

In the words of Profs. Fairchild and Wynn, the findings are "sobering."

### \$500 Awarded To Accounting Major

Raymond R. Charters, a senior accounting major from Bir-  
gen, Wash., was the recipient of a  
\$500 award from the Haskins and  
Sells Foundation presented April 12.

**THE AWARD** is given to outstanding accounting majors in their senior year. They are selected on the basis of scholarship and promise shown for success in the public accounting profession.

The award, to be given for five years at Brigham Young University, was presented for the second time this year.

## Have a ball in Europe this Summer

(and get college credits, too!)

Imagine the fun you can have on a summer vacation in Europe that includes everything from touring the Continent and studying courses for credit at the famous Sorbonne in Paris to living it up on a three-week co-educational romp at a fabulous Mediterranean island beach club resort! Interested? Check the tour descriptions below.

**FRENCH STUDY TOUR, \$12.33 per day plus air fare.** Two weeks touring France and Switzerland, sightseeing in Rouen, Tours, Bordeaux, Avignon, Lyon, Geneva, and to Mont-Saint-Michel and Lourdes. Then in Paris, stay at a youth hostel, shopping at Saks Fifth Avenue. Courses include French Language, History, Drama, Art, Literature, for 2 to 6 credits. Spend your last week touring Luxembourg and Belgium. All-expense, 70-day tour includes sightseeing, hotels, meals, tuition for \$12.33 per day, plus Air France Jet Economy round-trip fare.

**STUDENT HOLIDAYS TOUR OF EUROPE, \$15.72 per day plus air fare.** Escorted 42-day tour includes visits to cultural centers, sightseeing in France, Switzerland, Italy, Austria, Germany, Luxembourg, Denmark, Sweden, Norway, Scotland, England, Holland, and Belgium. Plenty of free time, entertainment, hotel, meals, everything included for \$15.72 per day, plus Air France Jet Economy round-trip fare.

**CLUB MEDITERRANEAN, \$13.26 per day plus air fare.** Here's a 21-day tour that features 3 days on your own in Paris, a week's sightseeing in Rome, Capri, Naples and Pompeii, plus 9 fun-filled, sun-filled, fabulous days and cool, exciting nights at the Polynesian-style Club Méditerranée on the romantic island of Sicily. Spend your days basking on the beach, swimming, sailing — your nights partying, singing, dancing. Accommodations, meals, everything only \$13.26 per day complete, plus Air France Jet Economy round-trip fare.

In Dusty Conditions...

# Invitational Athletes Compete; Smash Pair Of Meet Marks

by Phil McKnight  
University Sports Writer

A gusty wind played havoc on 4519 competitors Saturday but did not dampen the accompanying glory and heartbreak that attended the BYU Invitational every year.

The three-day sports spectacular saw a record number of performers enter the field in a combination of track and field, football, field and track, polo clubs on review. Five states sent representatives from 167 schools includ-

ing junior high schools, high schools and junior colleges.

**SOUTH CACHE** star Jack Saunders captured the meet's most outstanding trophy as he won the elements in commanding 6.23 points to win the all-around event by the widest margin in history, better than 1,000 points. Saunders had the fourth highest points for the 46-year-old competition and smashed the record by almost 300 points.

Only two new records were set, some possible records being disallowed because of the strong winds. Phil Reynolds of Payson hurled the discus 163'9" to break Utah Pentathlon record of 158'10". In the 1958 Olympics Dennis Gladwell soared 22'4" in the broad jump to erase a leap by Young of Las Vegas in 1954 by 14".

**LON ANDRUS** of Granite received a pleasant surprise when he not only failed to set a new high jump mark as expected, but failed to even win his specialty. Ken Blair of Grand

Junction, Colo., won the event at 5'11".

Grand Junction enjoyed similar success in the pole vault as Doug Wittner struggled upwind to clear 11'9" to give the out-of-staters two individual winners.

**REYNOLDS** became the only double winner in Class A with a height of 5'4 1/2" to cop the shot put.

Other outstanding performances came in the distance races with Gary Lambert of Olympus

turning in a 4:35.8 mile run to just barely miss Gary Gray of Griffith. Tom of 4:35.5 sec. in 1956. Jay Harrell of 4:35 sec. was closest at 2:01.9 in the 880 and Steve LaBettor bettered the 440 record with a .30.3 which was not allowed because of excessive wind.

The century went to Doug James of West in .99; the 200 was won by Earl Coombs of East; the high hurdles fell to Steve Lovelace of Salt Lake; the low hurdles to Bill Cunningham from Blackfoot, Idaho, in 2:32; and the javelin throw was taken by Hammer of Highland with a toss of 173 feet.

**RON LEE** of Fallon, Nev., was the outstanding Class B performer, as he reeled off a 4:39.2 mile and then followed it with a 2:01.2 880 for a clean sweep of the distance runs.

Two other double winners are Cliff B. Lewis of Lyons, Colo.; Frank Feely, both from Cody, Wyo. Frangie won the 100 and broad jump while Feely dominated the high and low hurdles.

**FOR LEWIS**, Colo., star shone in the Juniors. College events as well as the Cougars in the 100 and 200 m. dashes. Big Al Head used full advantage of his own powerful stride to take the 100 in :98.2, the 220 in :21.6, the 440 in :52.2, and anchor the winning 880 relay team.

Durrell Darrington of Ridge claimed the only JC record of the day in a 132'6" long jump. Murphy, which followed Mervin Murphy's 133' effort by one-half inch.

## Baseball Stats...

## First-Baseman Christiansen Tops Cat Batters

Recently released statistics show that Coach Glen Tuckett's ever-improving division-leading Brigham Young University baseball team is whacking the apple at a .337 clip.

**SOPHOMORE** first baseman Johnny Christiansen is the club's leading hitter with an amazing .451 percentage. The husky slagger from Glendale, Calif., has whittled out a total of nine hits in 20 times at bat, including a pair of home runs.

Gary Batchelor, the rifle-armed sophomore right-fielder is next in line with an even .400. Batchelor, who has appeared in only four of the division contests, has six hits in 15 appearances. He also had two home runs.

**CENTERFIELDER** Frank Herbert leads the club in hits with ten and total bases with 18 while hitting .370.

Shortstop Dan Moore, the club's leading home run hitter,

is hitting .350. Of Moore's seven, three have been home runs. Bob Mosteller, who plays the outfield when he is not pitching and catcher Jim Pierson are next in line. Mosteller has a .327 average and Pierson is .304. Both have a career of home runs. Pierson is the club leader in RBI's with 11.

**THIRD BASEMAN** Pete Marks is pushing the .300 mark with .296 and second baseman Ralph Ashby is hitting .285, just behind left fielder Bill Wright's .273.

The Cougars have pounded out a total of 14 home runs in their six Western Division encounters. They will hit 13 of them in their last four games.

Pitching-wise, Bob Mosteller leads the club in wins for the moment. He has won three games while losing none. His three complete games have earned him a very shining 1.33 earned run average.

**BOB NOEL** (2-0) with his

seven-inning perfect game performance against Montana lowered his ERA to 2.14. Noel has walked only two men in 21 innings.

Junior Bob Burch (1-0) who picked up a win against the University of Utah with two innings of brilliant relief ball is

the only other hurler to see action from the Cougar mound in division competition.

This week the Cougars travel to Missoula for a return doubleheader with the University of Montana which will start the second half of division play for the Mountain Cats.
